If you were interested in the options they provide:

At St. Vincent Women's Hospital, if you choose, your baby will be kept in our Pathology Department, transported to a local funeral home, cremated, and kept in a common urn for our [annual graveside service](#) – all free of charge. Families who experience their loss at home can bring their baby to our lab (located on the first floor of St. Vincent Women's Hospital) and similar arrangements will be made – all free of charge. Alternatively, families also have the option of making their own funeral service arrangements using a licensed funeral home of their choice.

Please call the Center for Perinatal Loss at (317) 415-7494 for more information.
